

Rebuild the **Mbinu Ndita's** Classrooms, destroyed by a storm

Mbinu Ndita Elementary School, located in the village of Mbinu Ndita, this area is being pioneered as an independent village. Mbinu Ndita is part of Prai Paha village, Ngaha Ori Angu district, East Sumba, NTT the location approximately take 1,5 hours from central of Eastern Sumba (Waingapu) by car.

Mbinu Ndita Parallel School, affiliated with Waitama Elementary School. When we visited this school last November 2019, the classroom consisted of one classroom for grade 1 and grade 2 in the separated building belonging to the village.

This parallel school was built because the children in grades 1 and 2 were too far go to the elementary school which was about 6-8 km walking.

The classroom is very simple using split bamboo walls, black sand floor with a tin roof and reeds. But the children look very comfortable to learn in the classroom.

Their classroom decoration is very interesting because it is designed with the interior of the students' and teacher creativity.

When studying

The classroom it's natural rustic design

"If rain or wind comes, the class will be closed because water floods our class"

said Mira, one of the teachers, when Annisa asked about how the atmosphere of teaching and learning every day at Mbinu Ndita school.

Today, December 20, 2019 we heard that two parallel classrooms in Mbinu Ndita collapsed caused the storm.

Luckily because there was no teaching and learning process in progress.

The children had finished their exams and had received report, so they were not in school when this disaster occurred.

What will happen to the children when they enter school next semester?

What can we do to help rebuild classes for Mbinu Ndita's children, so they can learn comfortably and safely in the future?

We continue to coordinate with school teachers, the Charis Sumba school who assisted young teachers and the Mbinu Ndita community.

We invite all parties to participate, let's collaborate to realize the classrooms of Mbinu Ndita to stand back ...

Expected assistance plan:

- Rebuild 2 classrooms in strong semi permanent building, simple and practical
- Providing 20 set of table and chairs used in the classrooms,
- Make a proper toilet
- Providing water tank for clean water reservoirs
- Package of school textbook for grade 1 and 2 based Elementary School Curriculum K-13 and educator tools.
