Organization

# #KAWANBAIKBERBAGI

REPORTED BY  
KAWAN BAIK INDONESIA FOUNDATION

FAIR & FUTURE

Bali Bangkit,  
Ekonomi Pulih

# BACKGROUND

COVID-19 pandemic has hit Indonesia and even the world and continues its second year to date. The total number of people in Denpasar City that have been exposed to the Coronavirus was 34,954 (source: kawalcovid19, 24 August 2021). The island of Bali, with the tourism sector as its main activity, has been greatly affected by this pandemic. That included travel agencies, hospitality businesses, restaurants, souvenir shops, transportation (land, sea, and air), and employees working on tourism-related. However, Bali should get back on her feet again and rise higher from COVID-19, because only then the economy will recover.

As an effort to prevent the spread of COVID-19, the government had disseminated information about the program for implementing the 3M health protocol that included handwashing with soap, wearing masks, maintaining the distance, which later developed into 5M by avoiding the crowds and limiting mobilization and interaction. In addition, another effort from the government in prevention is the vaccination program. It is recommended that every citizen in Bali gets his or her complete, 2-dosed vaccine shots that could be openly accessed at the public health centres (Puskesmas) or any other places that have collaborated with the Health Office to organize vaccination activities.

The Kawan Baik Indonesia Foundation (YKBI) whose work program is also in the health sector takes a role to participate in supporting government programs as an effort to prevent the spread of the COVID-19 virus. In this case, the Kawan Baik Indonesia Foundation works together with the Karang Taruna Kota Denpasar (City of Denpasar Youth Organization) had conducted a series of related activities, with funding support from the Fair Future Foundation.

Currently, the City of Denpasar Youth Organization has equipped with an ambulance that serves as a medical facility that can be used to evacuate COVID-19 patients or to deliver the remains to the cemetery. However, they are not equipped with disposables as the main supporting components, such as sets of PPE and daily operational costs. In addition, the Karang Taruna Kota Denpasar also partners up with a suitable party to conduct a vaccination event that conforms to the standards set by the Health Office.

Thus, YKBI will support Karang Taruna Kota Denpasar in the form of equipment and supplies for the health workers and daily operational and operational support during vaccination activities.

# ACTIVITIES

## REPATRIATION OF COVID-19 REMAINS

The ambulance owned by the Karang Taruna Kota Denpasar is currently active for medevac or medical evacuation of COVID-19 survivors, free of charge. Patients are picked up from their home to the nearest healthcare facility, or from one hospital to another when needed. This activity requires support in the form of equipment used by medical personnel or volunteers on duty to keep them safe and protected from virus contamination. In addition, fuel and daily operations are also required to keep the activity going.

## VACCINATION

As a form of activity to prevent the increase in the number of COVID-19 patients, vaccination is very important. Karang Taruna Kota Denpasar with support from the Denpasar City COVID-19 Task Force, Health Service, Social Service, and several medical personnel volunteers, had the capability, opportunity, and support to conduct vaccination event. Kawan Baik Indonesia facilitated communication with the management of Rumah Sanur Creative Hub to book the venue for the event. This vaccination was planned for September 26, 2021, with the first dose of 500 shots of Astra Zeneca.

The main targets of this vaccination activity are people with disabilities and the elderly (over 50 years of age), but also open to anyone with a Denpasar ID card, a Denpasar domicile certificate, or a work certificate in Denpasar.

# BUDGET PLAN

Expenditure plans to support COVID-19 handling and prevention activities in Denpasar City, include:

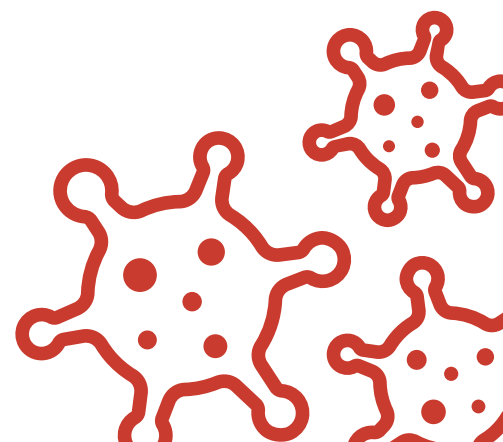

1.	Medical equipment	Rp. 10,425,000
2.	Logistic	Rp. 2,500,000
3.	Transport operational	Rp. 4,500,000
4.	Vaccination activities support	Rp. 3,000,000
5.	Documentation and publication	Rp. 10,000,000
6.	Team Support, administratios and secretarial	Rp. 10,000,000

**Total:**

**Rp 40,425,000**

This funding is needed to support the evacuation of COVID-19 patients or repatriation of remains for 30 days, and for the operational activities of the first dose of Astra Zeneca vaccination for 500 Balinese residents.

Financial support for activities in the first month given to Karang Taruna Denpasar City was obtained from the Fair Future Foundation through the Kawan Baik Indonesia Foundation. It is hoped that this proposal, can explore stronger funding to be able to support the Denpasar City Youth Organization activities for the upcoming months.

# MEDICAL EQUIPMENT FOR COVID-19 ACTIVITIES

The donation was handed over directly by the Kawan Baik Indonesia Foundation to the Denpasar City Youth Organization at the Kawan Baik basecamp at Rumah Sanur Creative Hub.

# TRANSPORTATION OPERATIONS

Meanwhile, other forms of support include operational assistance for transportation for the ambulance to run. Pertamina fuel vouchers are provided which can be disbursed at SPBU 54,801.02 on Jalan Gatot Subroto Tengah.

It is hoped that with this operational assistance, the movement of the Karang Taruna Ambulance in Denpasar City can reach various locations in Denpasar and its surroundings, even to areas without experiencing difficulties in providing fuel.

Clear form

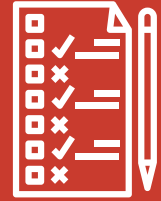

Each participant who registered via Google form link would receive a confirmation message via WhatsApp, confirming either one had been registered or entered the available quota, along with confirmation of the vaccination schedule for the first shot, and the schedule that broke down to the date and the hour for the second one.

There was a fairly long gap, approximately 3 weeks from registration to the implementation of vaccine activities that also greatly affected the number of confirmed attendance for vaccines. Some of the reasons stated were because they had received the shot at an earlier time or before September 26, 2021. The absence of some registered vaccine participants was also affected by the type of vaccine available. Some need the Astra Zeneca vaccine because it is required for certain purposes, such as for travel or certain jobs.

# PREPARATION VACCINATION ACTIVITIES

In preparation for vaccination activities, several things must be prepared including:

1. Coordination with Karang Taruna and health workers for the layout of the flow for the vaccine participants.
2. Coordination with Rumah Sanur for supplies and equipment needed for vaccination event.
3. Administration preparation
  - Print the COVID-19 Service Control Card (Kartu Kendali Pelayanan) document
  - Data of registered participants for the vaccine
  - Print and multiply work certificates for those who need it
  - Print table attributes to ease the vaccine participants to go to the table according to the flow.
  - Print the queue number for vaccine participants
4. Preparation of publications and documentation
  - Publication via Kawan Baik Indonesia's social media
  - Print for backdrop of activities to be installed on the stage
  - Photo and video documentation team coordination
5. Coordination with catering service for the team involved
6. Room sterilization for the one that will be used for vaccination event
